Internship

Infosys Springboard Virtual Internship 6.0

Feb 2026 - Apr 2026

Team Member

- Collaborated with a team to develop a Crowd Counting Using Video Analytics project using Python, OpenCV, and YOLOv8
- Conducted technical research, gathered project requirements, and coordinated with team members to ensure smooth project execution
- Contributed to the initial development phase by working on camera integration, video capture setup, and basic YOLO object detection implementation
- Tested and refined detection accuracy across different camera angles and lighting conditions during the development phase

Projects

Quick Commerce Platform | MERN Stack

Jul 2026 - Aug 2026

- Developed a full-stack quick-commerce platform using React, Node.js, Express.js, and MongoDB following MVC architecture
- Configured JWT-based authentication, bcrypt password hashing, and role-based authorization for secure access
- Added product browsing, search, wishlist, cart, address management, and order processing features
- Put the app live using Vercel (frontend), Render (backend), and MongoDB Atlas (database)
- Deployed Link : <https://client-two-hazel-83.vercel.app/>

Crowd Counting Using Video Analytics | Python, Computer Vision (YOLOv8) (Self Project)

Jun 2026 - Aug 2026

- Created a real-time people-counting system leveraging live camera feeds to track crowd density in public spaces
- Applied the YOLOv8 deep learning model for precise detection and tracking of individuals across video streams
- Structured modules covering video input handling, frame analysis, and zone-wise counting through bounding box and centroid logic
- Produced an interactive dashboard displaying live counts, zone statistics, and crowd insights
- Repository Link: https://github.com/saradoegar/RealTime_People_Counting_YOLOv8

Smart Attendance Tracker | C++ , File Handling

Jan 2026 - Feb 2026

- Developed a console-based attendance management system using C++ with a menu-driven interface
- Implemented file handling to permanently store, retrieve, and update student attendance records
- Built features to add, search, edit, and delete records with proper validation checks
- Reduced manual errors and improved accuracy through structured, OOP-based record management
- Repository Link: <https://github.com/saradoegar/Smart-Attendance-Tracker>

Skills

Languages C++,Python,JavaScript

Technologies/Frameworks: HTML, CSS, Git, GitHub , MySQL, YOLOv8, OpenCV, React.js, Node.js, Express.js, MongoDB

Domain Skills: DBMS, Problem Solving , Object-Oriented Programming

Soft Skills : Leadership, Team Coordination, Problem-Solving, Adaptability

Certificate / Certification

Python for Data Science

Feb 2026 - Feb 2026

IBM

Certified Data Science Professional

Oct 2025 - Oct 2025

Oracle

SQL Bootcamp

Sep 2025 - Sep 2025

Letsupgrade

Education

Lovely Professional University

2025 - Present

Master of Computer Applications | CGPA : 8.47

Phagwara, Punjab

CSK Himachal Pradesh Agriculture University

2021 - 2024

Bachelor of Science | CGPA : 6.3

Palampur , Himachal Pradesh

D.A.V Sr. Sec. Public School, Dehra

2020 - 2021

12th - Non - Medical | Percentage : 90.4%

Dehra, Himachal Pradesh

D.A.V Sr. Sec. Public School, Dehra

2018 - 2019

10th | Percentage : 94.0%

Dehra, Himachal Pradesh
